Academics

We love technology. And we understand it deeply. This enables us to pioneer ideas and shape strategies that keep our clients, partners and our people ahead of the game. We do this by asking the right questions: why is it this way? How can it be better? Then we explore, challenge, test and learn – continually improving the solutions we implement and the ways we work together. This helps us develop world-class innovations within sustainable mobility, energy and software to power a better future. We are so dedicated to this mission, you can feel it in everything we do.

# What we do

## FEV.io

- ADAS/AD
- Systems Engineering
- Connected Mobility
- SW & E/E Integration
- Functional Safety & Cyber Security
- SW & E/E Platforms
- Infotainment

## FEV Vehicle

- Vehicle Architecture
- Body in White
- Lighting
- Production
- Chassis & Platform Integration
- Exterior / Interior
- Vehicle Performance

## FEV Propulsion

- E-Mobility System
- Controls and Calibration
- Battery
- EDU & Transmission
- E-Drive Components
- Motor, Hybrid & Fuel Cell Powertrains

# What we do

## FEV Energy

- H2 Infrastructure and Electrolysis
- Power-to-X
- Energy Storage Systems
- Charging Infrastructure
- Sustainability
- Heating and Cooling Systems

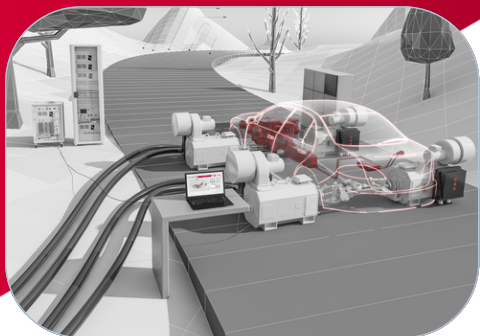

## FEV Consulting

- Business Strategies
- Advanced Technologies
- Smart Mobility
- Cost Engineering & Operations

## FEV Software & Testing Solutions

- Test Benches: Battery, E-motor, Fuel Cell, Hydrogen, HiL, Engine, Transmission, Powertrain, Vehicle, Chassis Dyno
- Simulation, Automation, Calibration, Information, Data, Control, Conditioning, Flow, Emission, OBD

# FEV Türkiye Facts & Figures

2011

Founded in  
December

25+

Local partner test cells for  
e-mobility, vehicle and powertrain

5+

HiL lab, power electronic lab, ADAS  
ViL, vehicle workshop

7

Offices in 5 cities

500

Highly skilled and  
globally experienced employees

To be the innovation  
powerhouse for mobility,  
energy and software that  
fosters sustainability and a  
greater quality of life for all.
