LOCATION

Hotel Pullman Aachen Quellenhof
Aachen, Germany

International Conference

DEAR COLLEAGUES,

The European emission reduction goals, ratified in the COP21 Paris agreement, require major CO₂ emission reductions from the transportation sector until the year 2050. However, there are different ways to achieve these decarbonisation targets.

Increasingly, the experts agree on the conclusion that, while propulsion system electrification is an important element of the solution, it is not the only approach for achieving CO₂-neutral mobility. In particular, when “well-to-wheel” rather than “tank-to-wheel” efficiency is considered, renewable alternative fuels become increasingly interesting as solutions.

Achieving a balanced fleet strategy requires focus on needs-based propulsion system solutions that assure sustainable and clean mobility. In this sense, a mixture of electrification, optimized combustion engines and synthetic fuels appears to be a promising combination.

Charging times, battery production costs and real driving range have already been significantly improved, becoming more and more competitive. While e-vehicles can lower local emissions in short distance and inner-city driving, synthetic fuels represent a good means for minimizing CO₂ emissions from the conventional combustion engines in existing fleets.

As a result, the percentage of renewable energy across the mobility sector is directly increased with fuels based on electricity, approaching zero emissions.

After the positive feedback in 2018 the international FEV conference on “Zero CO₂ Mobility” will take place again this year and offer a platform for strategic discussion on the potential and performance of various zero CO₂ emission strategies and introduce the latest developments in the fields of battery technologies, fuel cells and e-fuels.

You are cordially invited to join the other conference participants from the fields of research, development and politics as an important contributor to this forum of experts.

With best regards

PROF. DR.-ING.
STEFAN PISCHINGER
PRESIDENT AND CEO OF
FEV GROUP GMBH

YOUR BENEFITS

- > Targeted marketing opportunities through the channel of your choice.
- > Business contacts to leading decision makers and experts attending the conference.
- > Visibility of your company's image and brand for the target group in announcements and during the conference.
- > Presentation platform for your products and services to the target group during the conference.
- > Address and gain new contacts.

TOPICS

- > Zero and Low CO₂ Mobility Concepts
- > Zero and Low CO₂ Energy Carriers & Infrastructure
- > Zero and Low CO₂ with Renewable Fuels
- > Zero and Low CO₂ with Electrification
- > Zero and Low CO₂ with Batteries and Fuels Cells

CONFERENCE FACTS

- > Target Group:
 - > OEMs and suppliers – powertrain management, future product & technology planning responsables
 - > Oil, gas and energy suppliers & processing industry
 - > Political stakeholders
- > Conference Language: English
- > Venue: Hotel Pullman Aachen Quellenhof, Aachen, Germany

NEW exhibitor discount until 15 July 2019

TECHNOLOGY DISPLAYS
AND BRANDING CLOSE TO

JOIN AS
AN EXHIBITOR **-25 %**

TARGET GROUP

- > International OEMs and suppliers – powertrain management, future product and technology planning responsables
- > Oil, gas and energy suppliers and processing industry
- > Political stakeholders

VEHICLE DEMONSTRATIONS &
SPONSORING PACKAGES

**Exhibition booth for your product
presentations (6 m² / 8 m²),
1 conference ticket included**

3,200 € / 4,000 € excl. VAT

(raw space, without stand construction)

Promotional Possibilities

ADVERTISEMENTS

- > Your company brochure in the conference case

1,200 € excl. VAT

VEHICLE DEMONSTRATION

- > Present your demo vehicle in or at the conference hotel

2,200 € excl. VAT

Sponsoring Packages

GOLD DINNER SPONSOR

- > Exclusive evening event sponsoring:
 - > roll-up banner at the entrance of the restaurant
 - > presentation of your company logo on the menu cards
 - > company's promotional materials in the restaurant
 - > announcement during the session break
- > Your company logo in the conference program
- > Your company brochure in the conference case
- > List of participants with name and company after the conference
- > 2 conference tickets included
- > 6 m² exhibition stand (raw space, without stand construction) no additional conference ticket

9,900 € excl. VAT

SILVER LUNCH SPONSORING

- > Exclusive Lunch Sponsoring:
 - > roll-up banner at the entrance of the restaurant
 - > presentation of your company logo on the menu cards
 - > company's promotional materials in the restaurant
- > Exclusive Sponsoring of writing blocks and pens for both conference days placed in the conference cases (material to be provided by your company)
- > Your company logo in the conference program
- > List of participants with name and company after the conference
- > 1 conference ticket included

4,900 € excl. VAT

APPLICATION FORM

CONFERENCE „ZERO CO₂ MOBILITY“

Conference in Aachen, 7–8 November 2019

Bitte per E-Mail senden an: benesch@fev.com

Rechnungsanschrift/
Invoice Address

Firma / Company

Abt. / Department

Straße / Street

PLZ, Stadt / Zip-Code, City
