Aachen/Turin (Italy), July 2023 – Once a year, the Italian commercial vehicle manufacturer IVECO invites their partners and service providers to a networking event in Turin. Part of this event is a globally recognized supplier award, with which FEV was recognized this year as “Engineering Top Performer No. 1”. The award honors the long-lasting partnership as well as FEV’s comprehensive engineering and consulting expertise in the development of drive solutions for CO<sub>2</sub>-neutral mobility.

“We are currently experiencing what is probably the biggest transformation of the mobility sector, and FEV is a key driver of this process,” said Dr. Norbert Alt, COO of FEV, during the event. “With our experience and extensive know-how in the areas of electrification, fuel cells as well as hydrogen combustion engines and through our strategic expertise, we are supporting IVECO as a global technology and market leader to successfully go through this transformation. We are therefore very pleased to receive this valuable and motivating award for our commitment.”

The Italian FEV team, supported by the global expert network of the development service provider, has been developing

sustainable mobility solutions with the Turin-based commercial vehicle manufacturer for many years. Last fall, for example, the demonstrator of the fuel cell-powered IVECO Daily transporter was presented at the renowned 'Aachen Colloquium Sustainable Mobility'.

In addition to developing standard-setting, CO<sub>2</sub>-neutral drive solutions, FEV and IVECO are also working on innovative solutions in key areas such as Software Defined Vehicles and future E/E architectures. FEV Consulting is a continuous partner in the development of IVECO's strategic direction, especially in the areas of vehicle portfolio and powertrain technology.

Dr. Alt believes FEV is well positioned for the future: "We look forward to working with our partners to meet the challenges ahead and ultimately make the transition to Net-Zero for the mobility sector – with solutions that will ensure a livable world for our society in the future."

### **About FEV**

#### **FEV has always pushed the limits.**

FEV is a globally leading engineering provider in the automotive industry and internationally recognized leader of innovation across different sectors and industries. Professor Franz Pischinger laid the foundations by combining his background in academia and engineering with a great vision for continual progress. The company has supplied solutions and strategy consulting to the world's largest automotive OEMs and has supported customers through the entire transportation and mobility ecosystem.

#### **As the world continues to evolve, so does FEV.**

That's why FEV is unleashing its technological and strategic expertise into other areas. It applies its forward thinking to the energy sector. And its software and system know-how will enable the company to lead the way making intelligent solutions available to everyone. FEV brings together the brightest minds from different backgrounds and specialties to find new solutions for both current and future challenges.

#### **But FEV won't stop there.**

Looking ahead, FEV continues to push the limits of innovation. With its highly qualified >7,300 employees at more than 40 locations globally, FEV imagines solutions that don't just meet today's needs but tomorrow's. Ultimately, FEV keeps evolving – to a better, cleaner future built on sustainable mobility, energy and software that drives everything. For the companies' partners, its people, and the world.
